Map filed	JUL 14 1998						

The applicant AMOR IV CORPORATION, hereby makes application for permission to change the Point of Diversion of water heretofore appropriated under State of Nevada Permit No. 50585

- 1. The source of water is An Underground Source
- 2. The amount of water to be changed 3.6 c.f.s.
- 3. The water to be used for Binary Geothermal Power Plant (Industrial)
- 4. The water heretofore permitted for Binary Geothermal Power Plant (Industrial)
- 5. The water is to be diverted at the following point located in the NE%-NE% of Section 1, T.19N., R.30E., M.D.B.&M., from a point that bears N 46°56′57" E a distance of 804.35 feet to the NE corner of Section 1, T.19 N., R.30 E., M.D.B.&M..
- 6. The existing permitted point of diversion is located within the NE%-NE% of Section 1, T.19 N., R.30 E., M.D.B.&M., from a point that bears N 51°27'32" E a distance of 754.00 feet to the NE corner of Section 1, T.19N., R.30E., M.D.B.&M.
- 7. Proposed place of use See attached "Place of Use"
- 8. Existing place of use See attached "Place of Use"
- 9. Use will be from January 1 to December 31 of each year.
- 10. Use was permitted from January 1 to December 31 of each year.
- 11. Description of proposed works Geothermal Well No. 81-1, Wellhead equipment, Downhole geothermal pump and 10"-20" pipelines to power plant.
- 12. Estimated cost of works \$1,120,000.00
- 13. Estimated time required to construct works **Existing Well See attached** "Completion Diagram" for details.
- 14. Estimated time required to complete the application of water to beneficial use **2 years**
- 15. Remarks: Geothermal Fluids produced from Well No. 81-1 are used to operate a Binary Geothermal Power Plant, 100% of produced fluids will be injected back into the Geothermal Resource with the exception of those fluids exempt under NRS 534A.040.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the geothermal fluid heretofore granted under Permit 50585 is issued subject to the terms and conditions imposed in said Permit 50585 and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit is issued subject to existing rights. understood that the amount of geothermal fluid herein granted is only a temporary allowance and that the final right obtained under this permit will be dependent upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease of fluid pressure and heat. The well shall be equipped and maintained to prevent any waste of the geothermal fluid. Accurate measurements must be kept of discharge of the production well and the amount of fluid injected into the injection well to determine the total amount of fluid diverted and consumed for a beneficial use.

The production and injection well are to be cemented from the producing levels to the surface to protect fresh water zones. This permit is issued subject to the condition that only geothermal fluids are to be diverted and used beneficially for heating purposes and fresh, cold water aquifers are not to be diverted. The used geothermal fluids are to be returned to the source via the injection well. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. A detailed log on the injection injection well. well and/or other analyses of the system used for returning the used geothermal fluids to the source must be submitted together with the Proof of Completion.

An annual report for this well must be filed under this permit describing the amount of geothermal fluid diverted and consumed to a beneficial use for the calendar year. This report must detail

the amount of fluid produced and injected.

The total withdrawal of the geothermal fluid shall be limited to 2,606.0 acre-feet per year but the total consumptive use of the geothermal fluid is limited to only incidental fluid losses in the system and in no case shall it amount to more than 10% of the volume withdrawn annually. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.

This permit does not extend the permittee the right of ingress

and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined consumptive duty of water under Permits 64302, 64303, 64304, 64305, 64306 and 64307 shall not exceed 1,566.0 acre-feet annually. (CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.6 cubic feet per second, but not to exceed a consumptive use of 261.0 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

December 10, 1999

Proof of completion of work shall be filed before: $\underline{January 10, 2000}$

Application of water to beneficial use shall be filed on or before: December 10, 2001

Proof of the application of water to beneficial use shall be filed on or before:

January 10, 2002

Map in support of proof of beneficial use shall be filed on or before: ${\bf N}/{\bf A}$

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,
